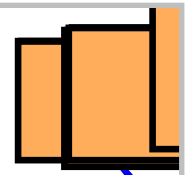
1.1 - 1.2 Review/ Sort-of

Sept. 7, 2006

- Perimeter: Distance Around an object.

* Add-up all the Sides
* standard Units

- **Area**: the amount of Space "Inside" An object (figure)



* △ => $A = \frac{1}{2}bh$ b & h always form a 90° ∠

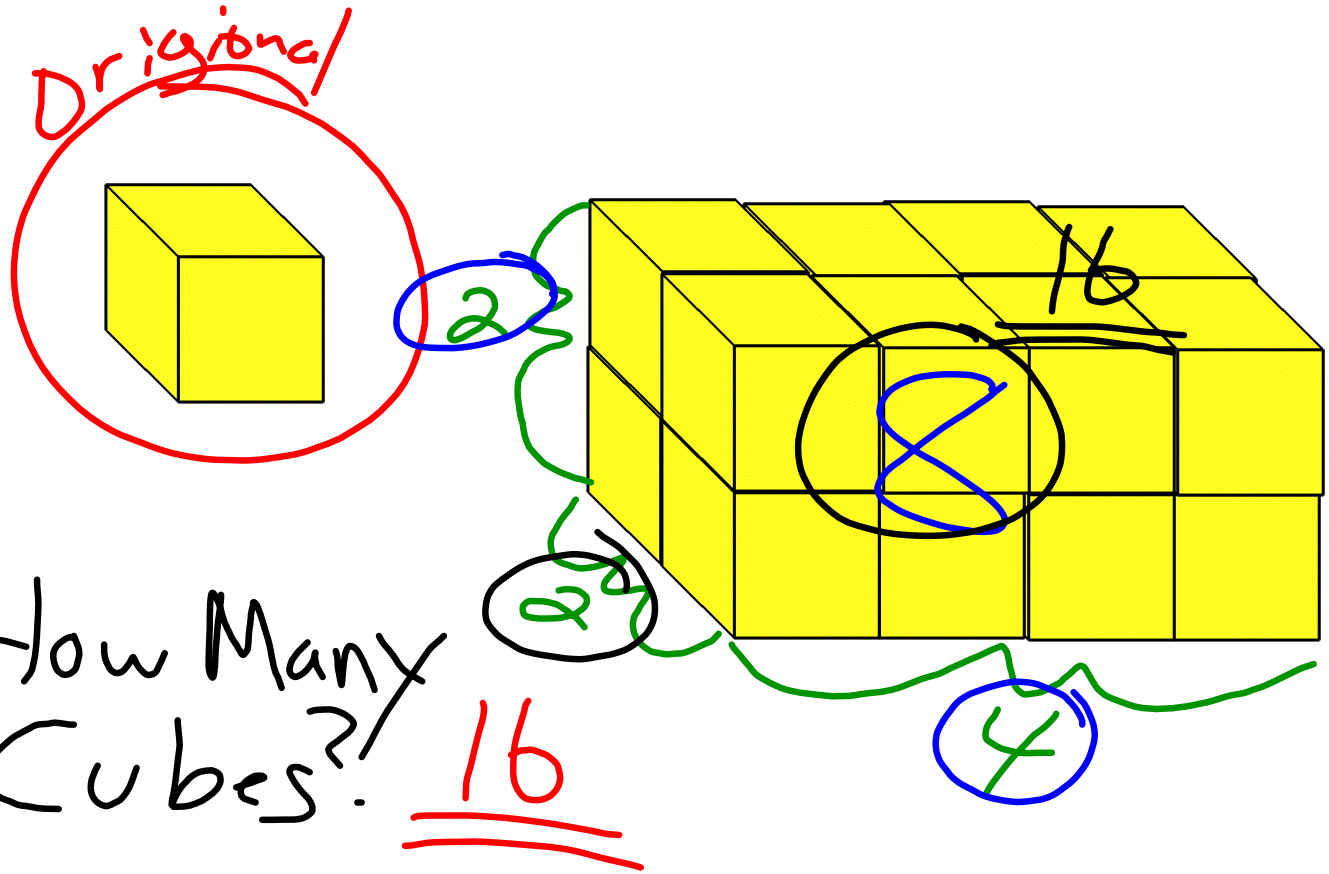
□ ▭ => $A = l \cdot w$ or $b \cdot h$

* Squared units

- Volume: the Amount of Space that fills a 3-D object.

* 
$\Rightarrow V = l \cdot w \cdot h$

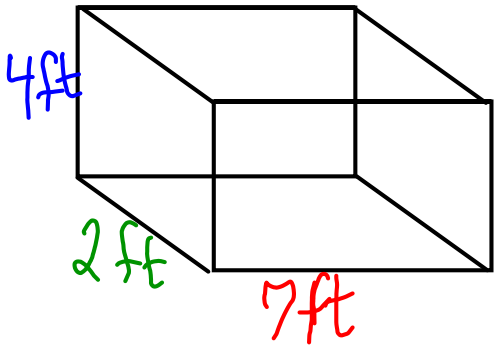
* cubed units



How Many Cubes? 16

find the Volume of a Box that is 4ft by 7ft by 2ft.

- Draw the Picture.



$V = l \cdot w \cdot h$

$= 7ft \cdot 2ft \cdot 4ft$

$= 56 ft^3$

Fraction Bar.

$7^3 = 49 \cdot 7 = 343$ $\quad 8^3 = 64 \cdot 8 = 512$

$$\frac{7^3+1-(11\cdot 4)}{2(8^3+8\cdot 11)} = \frac{2^3+1-(44)}{2(512+8\cdot 11)} = \frac{343+(-(44)}{2(512+88)}$$

$$= \frac{344-(44)}{2(600)} = \frac{300}{1200} = \frac{3}{12} = \frac{1}{4}$$
