

Algebra I, Periods 4 and 7: On Friday we reviewed the Chapter 8.1-8.4 Quiz Corrections. Every student, if not already, should turn in those corrections in their respective bin-slot next to the computer monitor.

Today will be two assignments, review and something new. First have everyone do Pg. 491: 21-28 all. This is review and they should have NO problem completing them. They would turn them in the bin-slot respective to their class. The second assignment, would be to read and study Pgs. 469-471. On each page, after each example, are practice problems labeled “Checkpoint”. Have them try and complete the Checkpoint problems 1-16. They may not get this assignment done. At the end of the period ONLY tell them that if they are not complete to turn it Tomorrow.
