6.5. Solving Compound Inequalities w/ "OR"

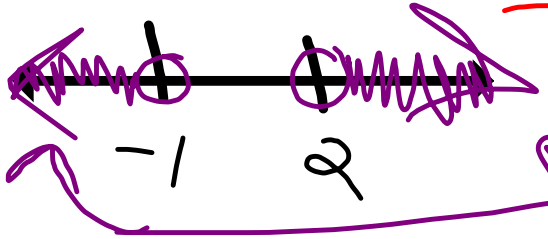
April. 30, 2007

"OR" $\{2,4,6,8\}$ or $\{1,2,3,4,5\}$ Union all together

Union $= \{1,2,3,4,5,6,8\}$

Write a Compound Inequality that represents $\mathbb{R}$ less than -1 "OR" greater than 2.

$x < -1$ or $x > 2$



* Cannot Combine for that would be "and"

Graph is of our C.I.

Solve "OR"

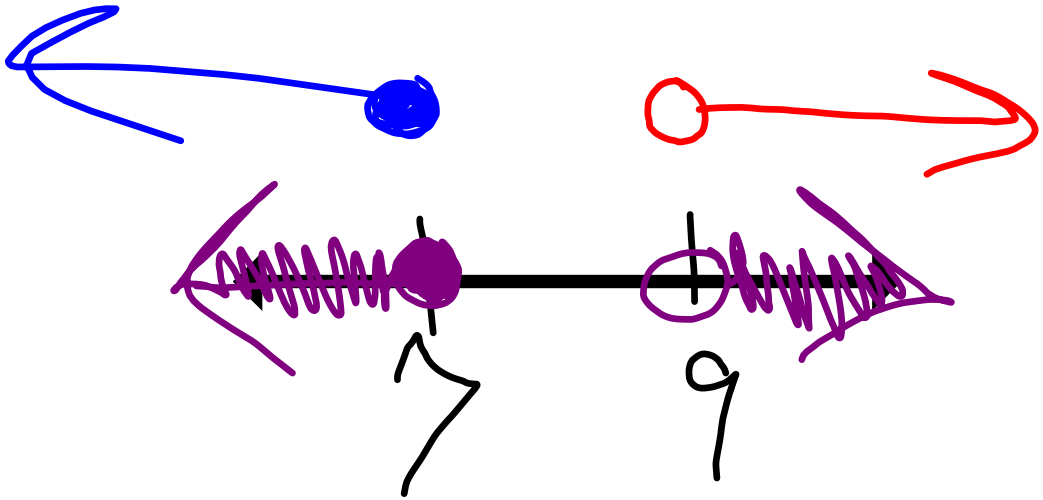
$x - 4 \leq 3$

$+4 \quad +4$

or

$\frac{2x}{2} > \frac{18}{2}$

$x \leq 7$ or $x > 9$

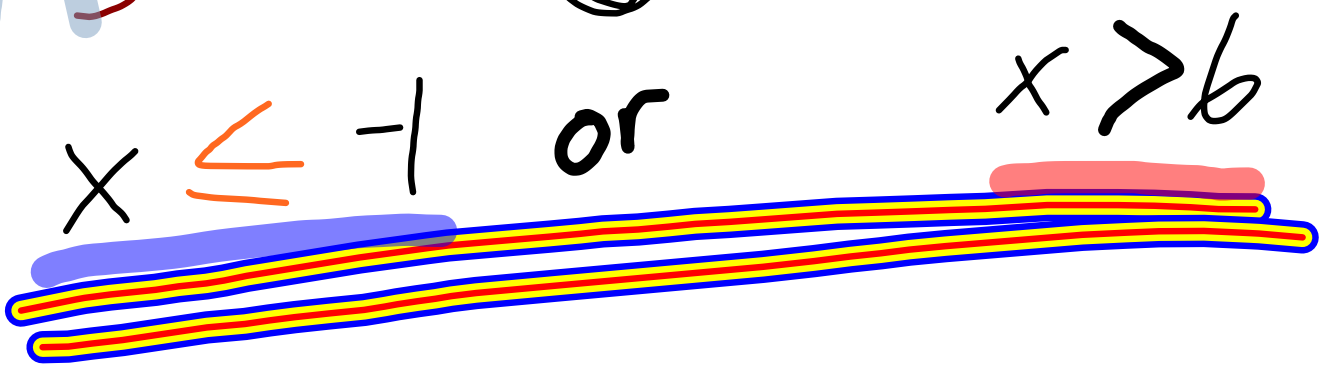


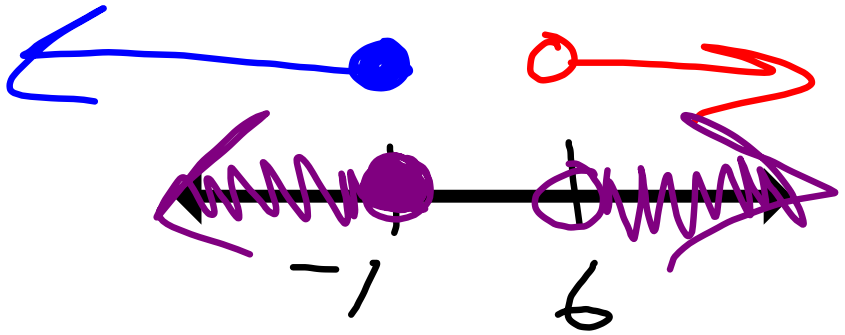
$-3x + 1 \geq 4$ or $2x - 5 > 7$

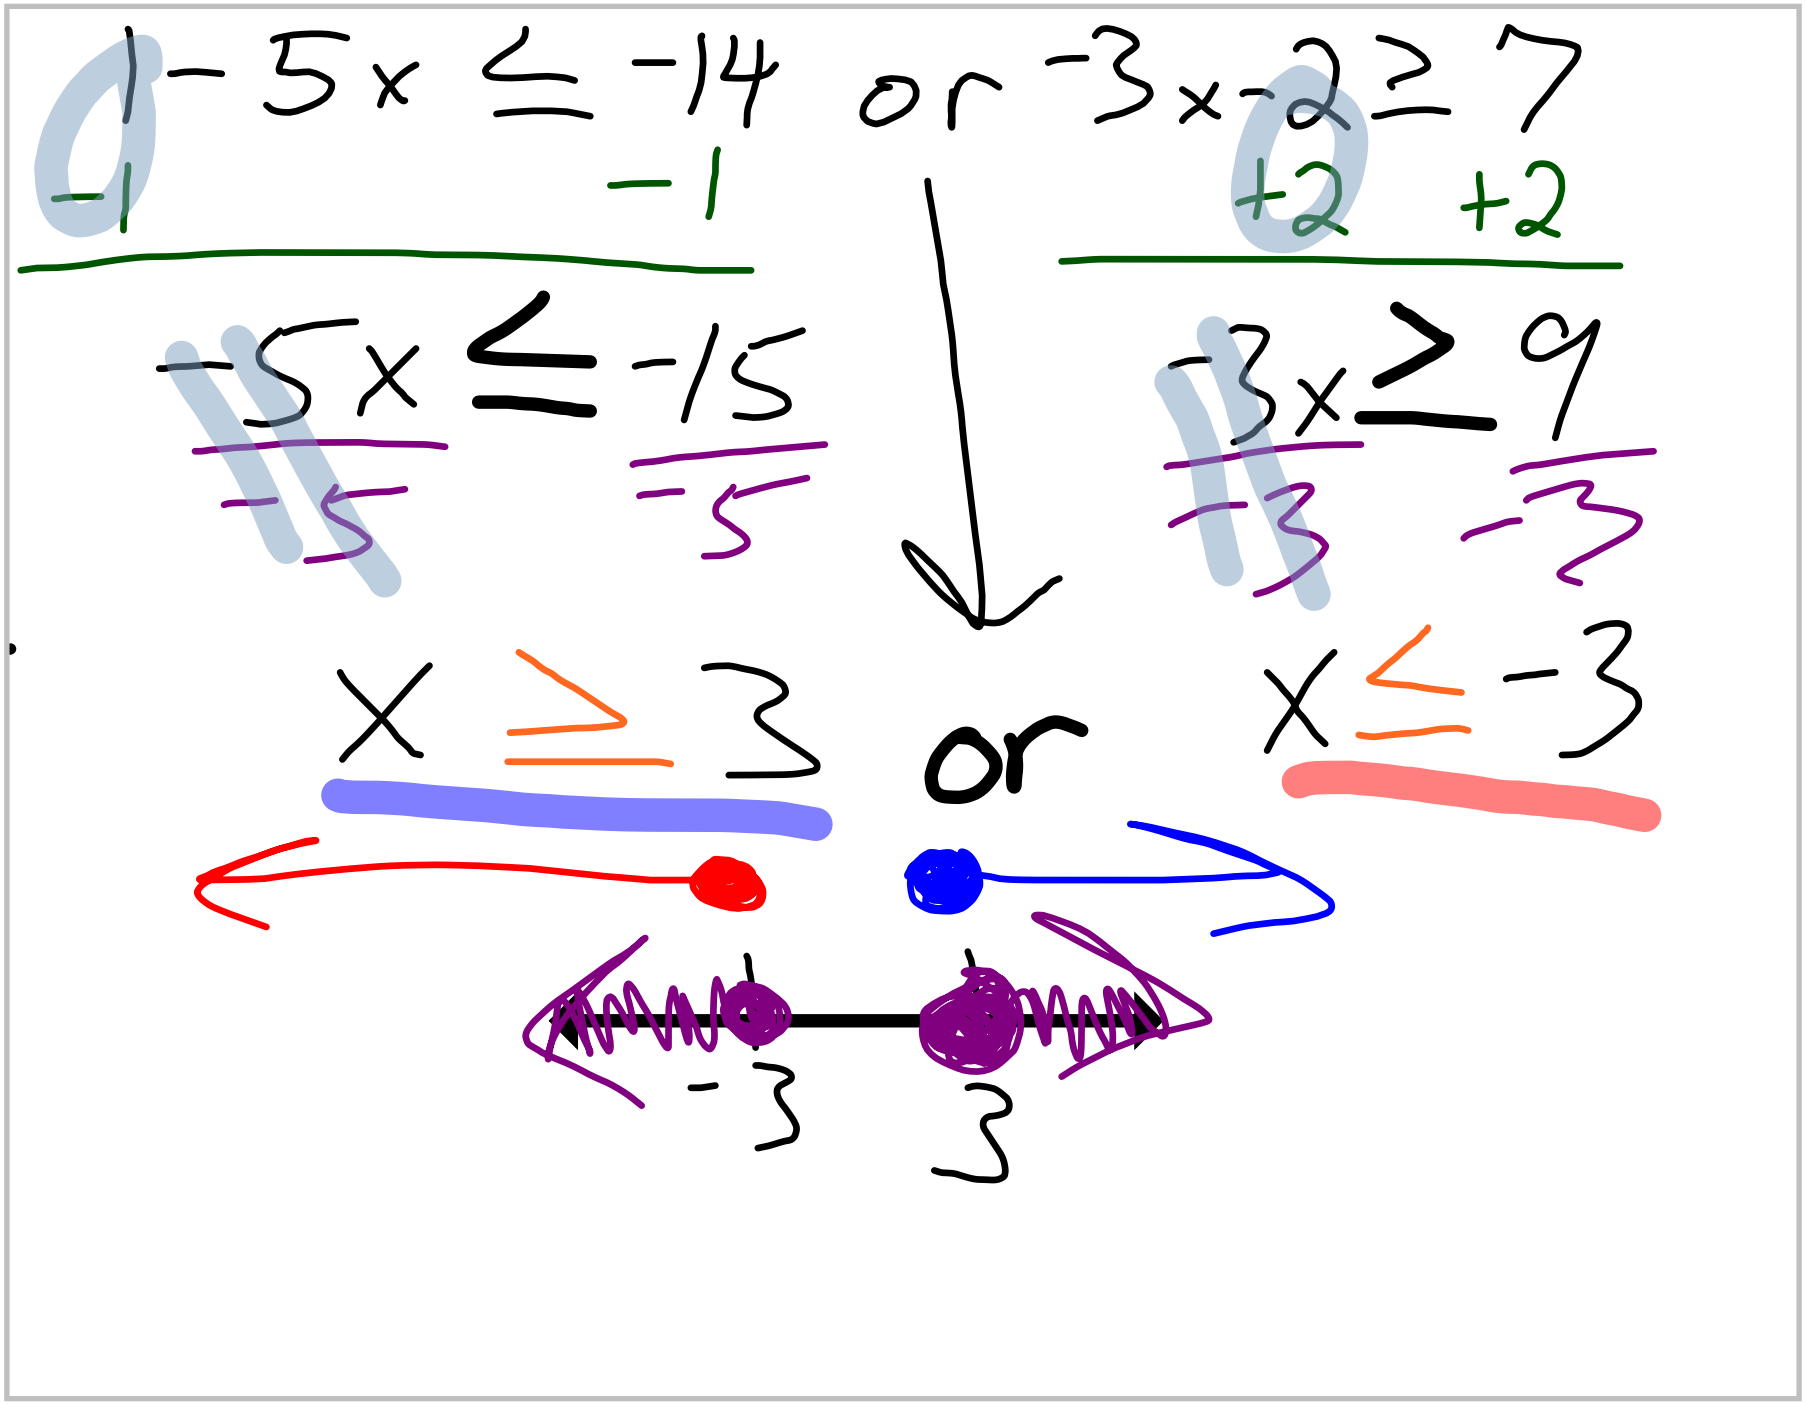
$-1 \quad -1$ $+5 \quad +5$

$\frac{-3x}{-3} \geq \frac{3}{-3}$ $\frac{2x}{2} > \frac{12}{2}$

$x \leq -1$ or $x > 6$







1 − 5x ≤ −14
−1 −1
−5x ≤ −15
−5 −5
x ≥ 3
or
−3x − 2 ≥ 7
+2 +2
−3x ≥ 9
−3 −3
x ≤ −3
or
−3
3
