4.3 Graphing Horizontal & Vertical Lines.

Nov. 08, 2006

Review (x, y)

$$Ax + By = C$$

If $A=0$: Then $By = C$

If $B=0$: Then $Ax = C$

Still Graph Lines

Verbs:

Plot: Create a point. (must have an ordered pair)

Graph: Create a line. (will have an equals sign)

If $A=0$: Then $By=C$

Graph

EX)

$$2y = 10$$

$$y = 5$$

If $y=5$, Then it
does not matter
What 'x' is!

This creates a horizontal line

If $B=0$: Then $Ax=C$

Graph
ex

$$\begin{array}{r} -7x = 21 \\ \hline -7 \quad \quad -7 \\ \hline x = -3 \end{array}$$

If $x = -3$, Then it
does Not matter
what y is!

This creates a Vertical line.
